Premium Hardwoods, Inc. is a state-of-the-art band mill that annually produces ten million feet of superior quality lumber for flooring and furniture customers. The facility is designed to maximize yield from its timber resources and manufacture the very best Appalachian hardwood products.

The 32,000 square foot plant houses state-of-the-art machinery that includes a whole log metal detector, debarker, edger, chipper, scanners, and an automated “hands free” grading system. The driving force of the production line is the McDonough 6-7A bandmill and resaw which utilizes a 40 ft. long, 1/8” kerf, 240 tooth blade that travels at 8,000 feet per minute. The plant also consists of in-house manufactured equipment such as infeeds, decks, green chain, transfers, roll cases, and a PATZ system.

Our experience in the kiln-drying industry makes us capable of treating lumber to comply with international standards for wood products. We also have a company-owned fleet of trucks for emergency deliveries.

Premium Hardwoods, Inc. entered the 21st Century designed and tooled to compete in the global marketplace. Our experience and dedication to quality ensures our ability to supply our customers in Kentucky, across the nation and around the globe with the best Appalachian wood products.

Buyers of Standing Timber

To keep an adequate supply of raw materials on hand, Premium Hardwoods purchases standing timber from private landowners. However, we understand that trees aren’t just important to our industry, but also to the natural habitat around us.

Unlike many natural resources, timber is renewable. That means by taking the proper precautions, timber can continue to be harvested for industry indefinitely resulting in economic benefit to landowners while preserving the natural beauty and habitat of the forestland. And, did you know that timber harvesting actually benefits the forests? Proper forestry management practices help improve the overall health of the forest, reduce pollution, and create better shelter for wildlife.

Please allow us to help you with your timber management; after all, managing your timber effectively is a direct means to helping preserve Earth’s renewable resources. To learn more, contact timber@woodunlimited.net.

Master Logger Program

Premium Hardwoods utilizes certified loggers who have graduated from Kentucky’s Master Logger Program to harvest landowners’ timberland. Master loggers are trained in proper forestry techniques to ensure that the harvesting of the timberland does not harm the environment.

Timber Management Services

Premium Hardwoods also offers these additional services to landowners enrolled in our Timberland Stewardship Program:

-  Prepare a timber cruise
-  Prepare a timber appraisal
-  Provide timberland improvement plans
-  Mark the timber for cutting
-  Mark & maintain the boundary lines
-  Conduct & co-ordinate timber sales
-  Provide topographical maps
-  Enroll the timberland in the KY Forest Stewardship Program
-  Provide income tax information relating to forestation expenses and timber sales
-  Provide relevant information from the United States Forestry Service
